HW: Create a structure variable (student) & estimate size of structure manually then WAP (C) to find size of structure using size of operator. Now observe both the o/p's are they same or different?

H.W

Q.)

Ans

```
#include <stdio.h>
int main() {
    struct emp {
        int id;
        char name[50];
        struct emp *ptr;
    };
    int size = sizeof(struct emp);
    printf("size = %d bytes\n", size);
    return 0;
}
```
